Committed to delivering pixel perfect results and filling the gaps of QA, Product & Design.
Currently building shipstation.ai, an open source portfolio generator

Work experience

Technical Lead Frontend at Dukaan and Bot9.ai – Bangalore
Mar 2022 – May 2024

Scaled the frontend team with hiring, PR reviews and mentorship. Handled customer support and delivered 100+ features in the Dukaan Ecosystem.

Senior Frontend Engineer at Dukaan – Bangalore
Jan 2021 – Mar 2022

Founding team member at Dukaan, single handedly managed the complete seller platform and built/rewrote all core features

---

React Native Developer at Nickelfox Technologies – Noida
Sep 2019 – Jan 2021 – 1 year and 4 months

Worked on many React JS and React Native Projects for various international clients. Learned the importance of good UX.

Software Engineer at Datopic Technologies – Noida
Feb 2018 – Sep 2019 – 1 year and 7 months

Started my tech career here and worked on various technologies like Big Data, Blockchain, Backend, Mobile app development. Turns out I was made for Frontend development.

Skills

Frontend: React JS, React Native, Next JS, Expo, Tailwind CSS
Backend: Node JS, OpenAI & Anthropic, Supabase, Flask, Docker

Why hire me?

→ Can deep dive into anything and come back with solution
→ High agency and ownership
→ Plan and delegate work efficiently
→ Communicate across teams and stakeholders

About me

→ I Love – Rock & Techno Music
→ Gardening is my passion
→ Love to work on side projects and have shipped 5-6 of them

References

Subhash Chaudhary – CTO at Dukaan. I reported to Subhash directly.

Atul Dubey – Ex VP Engg. at Dukaan. I used to work directly under Atul.
